Build-It Again

Cubby Houses and
Children's Furniture

Dear <firstname>,

Have you found a Christmas gift for <child's name> yet?

As a subscriber to Practical Parenting magazine, I know you are committed to giving your <child/children> the best start in life. One that is filled with fun and challenges them to be creative and imaginative.

That's why I wanted to tell you about the new cubby house packs from Build-It Again.

The cubby house packs are the must have toy for this Christmas and you have probably already seen them through their sponsorship of Playgroups Victoria.

Each pack contains lightweight, plastic panels that snap together with an innovative 7-way tongue and groove connector that is strong enough to hold the weight, but simple enough for little fingers.

When <child's name> has finished playing, the panels simply slide apart and store flat under a bed or a wardrobe ... to be played with again another day.

During my time with Play School and with my own children I was often disappointed by the lack of creativity in the toys for our children.
This Christmas give the gift of imagination.
